

SAT-FC01

Optical Fiber Cleaning Tool Kit

AITELONG
Keeping your system safe and running

This tool box is a solution integrating the advantages of daily cleaning and maintenance of base station and needs of different maintenance work flow. It is applicable for daily maintenance of optical communication station, transmission room, laboratory, optical fiber network and etc.

The equipped tool could extend the choices of user

Traditional cleaning method is decontaminating the fiber connector by alcoholic cotton, which could easily cause the wear of fiber connector. It is prohibited to clean the fiber by cotton in foreign countries.

SAT-FC01 Fiber connector cleaner is used for the cleaning of all fiber connectors of optical fiber communication transmission network, which is a product with high technical content. It is used for cleaning off the instrument and equipment of any fiber connector.
